PROFILE

AI Engineer with a background in HR and people management. Working remotely and part-time, I built an internal HR chatbot and a weekly sales forecasting model, and I have a portfolio of deployed machine learning, NLP and full-stack applications. Alongside this, I have recruited, onboarded and paid staff as an HR Administrator and as the owner of a restaurant business.

PROFESSIONAL EXPERIENCE

AI Engineer (Remote, Part-time), Almraghy, Cairo, Egypt — Jan 2024 – Sep 2026

- Built an internal HR chatbot in Python using the OpenAI API, answering policy and procedure questions for 20 employees; designed the knowledge base from my HR background
- Built a weekly sales forecasting model in Python with Prophet to support business planning

HR Administrator, Rahim Transportation Ltd / M&A Transportation Ltd, Durham, UK — May 2024 – Aug 2026

- Joined at launch and set up HR administration for a passenger transport business; moved with the operation when it transferred to M&A Transportation in 2025
- Ran end-to-end recruitment, from advertising roles and shortlisting to arranging interviews, hiring around 10 staff
- Delivered onboarding for new starters, including right-to-work checks and induction paperwork
- Prepared employment contracts and maintained personnel records

Owner and Director, Taj Mahal, Durham, UK — Jan 2021 – Oct 2023

- Owned and ran the restaurant as a limited company, overseeing staffing, finances and daily operations
- Managed the full hiring process, from advertising roles to interviewing and selecting staff
- Ran payroll for all employees, ensuring accurate and timely pay

SELECTED PROJECTS

- Medical Text Summariser: fine-tuned t5-small to write radiology impressions from findings (ROUGE-1 F1 0.58), served with FastAPI on Render
- Job-Change Prediction: scikit-learn pipeline scoring 19,000 candidates on job-change intent (0.814 ROC-AUC)
- AI Fleet Management: Flask and SQLite app with an OpenAI-powered assistant that answers questions from live data
- Build Your Own GPT: 10.8M-parameter transformer written from scratch in PyTorch
- Applicant Tracking System: React, Express and PostgreSQL recruitment pipeline with JWT roles and 27 integration tests
